

ONKAR DINKAR SHINDE

Software Developer | Java | Spring Boot | Microservices | Kafka | Kubernetes | Telecom OSS | AI-Assisted Engineering

Pune, Maharashtra | +91-9579493957 | onkar131097@gmail.com | [in linkedin.com/in/onkar-shinde-21a41a1ab](https://www.linkedin.com/in/onkar-shinde-21a41a1ab) | gitlab.com/Onkar_131097

Profile Summary

Backend engineer with 4+ years building telecom OSS microservices using Java, Spring Boot, Kafka, Docker, Kubernetes and Jenkins. Delivered TMF-622 order orchestration, logistics workflows, and API gateway migrations for Telstra NBN, Fiber, and Digital SIM platforms. I am skilled in performance tuning, event-driven architecture, and AI-assisted development and test automation.

Technical Skills

Languages and Frameworks: Java, Spring, Spring Boot, Shell Script (4/10), JavaScript (3/10), Python (3/10)

Architecture: Microservices, REST APIs, Event-Driven Architecture, TMF Standards, RBAC

Data and Messaging: Apache Kafka, PostgreSQL, MySQL

DevOps and Cloud: Docker, Kubernetes, Jenkins, Bamboo, AWS (EC2, S3, Load Balancer), PCF, Git, Gerrit

Monitoring: Splunk, Fluent Bit, ELK, New Relic

Tools: Cursor, Copilot, APIGEE Edge, Azure Entra ID, Tricentis Tosca, Confluence, JIRA, Open API

OS: Linux, Windows

Experience

Amdocs DVC India Pvt Ltd

May 2022 - Present

Software Developer | Pune, India

- Developed 8+ event-driven microservices for TMF-622 order orchestration, handling 50K+ daily orders across NBN, Fiber, and Digital SIM products.
- Tuned Kafka consumers and PostgreSQL queries, reducing order fulfillment latency by 20% under 3K+ concurrent SVT transactions.
- Built Complex Logistics workflows end-to-end, cutting manual coordination by 30% across connected dev through PROD environments.
- Executed OKAPI/OGW/Entra ID migration with zero-downtime cutover, securing 15+ production APIs under centralized gateway and RBAC.
- Delivered Order Manager Simulator and EventHub for Telstra Fixed Site Connectivity, reducing integration test cycles by 40%.
- Built ITAF Tosca automation framework with AI-assisted test case generation, cutting regression authoring effort by 25%.
- Used AI coding assistants (Cursor, GitHub Copilot) for faster development, code review, and production defect root-cause analysis.
- Recognized at Amdocs Townhall 2025 for delivery on TMF-622, FSC, and Adaptive Collab milestones.

Projects

Complex Logistics

Java, Spring Boot, Kafka, Kubernetes, TMF

- Microservices platform for telecom order logistics orchestration and lifecycle management.*

Order Manager System (Simulator + EventHub)

Fixed Site Connectivity

- Simulator and event hub for Telstra Internet Direct integration testing and validation.*

OKAPI / OGW / Entra Migration

API Gateway Consolidation

- Zero-downtime migration securing production APIs under centralized gateway and identity policies.*

ITAF Solution

AI-Enhanced Test Automation

- In-house Tosca framework with AI-assisted test case generation for regression automation.*

Certifications

- AWS Cloud Practitioner**
- Tricentis Tosca Fundamentals - Automating Web Application Testing (AS1)**
